

EDUARDO DOMÍNGUEZ NAVARRETE

AI Lead - AI / ML Engineer

Email: navarrete.eduardo.d@gmail.com | Phone: +52 5584016361

PROFESSIONAL SUMMARY

AI Engineer specializing in **Generative AI, Agents Systems, Data-Driven and OpenShift solutions**. With a background, I bridge the gap between technical execution and business strategy. Experienced in deploying AI for **Supply Chain optimization** and **Urban Mobility** across Latin America. Proven track record in leading technical teams, managing budgets, and delivering high-impact public speaking engagements on AI innovation

PROFESSIONAL EXPERIENCE

IBM – Delivery Consultant Data & AI (November 2024 – Present)

- Developed and implemented Generative AI and AI solutions for Supply Chain optimization focusing on metrics control, inventory control and last mile delivery
- Creation of AI agents with ADK to interact with DB using LLM's focusing on data-driven decision making supported by generative ai
- Processed large volumes of data to cleaning, analysis and dashboard creation, using Tableau, Python, Pandas and SQL with DB2
- Developed an LLM classification system for user feedback, utilizing cosine similarity for semantic evaluation
- Direct client interaction and collaboration with teams from different countries
- Conducting workshops focused on GenAI, agent creation using ADK, and the use of Spark and data pipelines.
- Managed application lifecycles and executed proofs of concept in local OpenShift environments (Single Node). Deployed and exposed services via the CLI, performing container troubleshooting (log review, remote access, and internal network diagnostics) to validate application health
- Developing workshops on creating AI agents with ADK
- Managed a team of 3 developers, responsible for onboarding, troubleshooting issues, creating process documentation and executing project implementations.

IBM – GenAI Engineer (November 2023 – November 2024)

- Built LLM-based Proof of Concepts using Watsonx.ai, Llama 3, Mistral, and Whisper (speech to text).
- Extracted and analyzed data using Python; visualized results using Matplotlib.
- Developed RAG pipelines for chatbots; integrated AI into React projects and APIs.
- Delivered client-facing demos and participated in stakeholder meetings.

CONSULCA – Academic Instructor (December 2025 – April 2026) – Part time

- Delivered training to Latin American Institutions on applying reinforcement learning, neuronal networks, computer vision and generative ai for public transport management, focusing on delay modeling, traffic congestion prediction and intelligent urban traffic signal systems for cities.

Binary Brains – Co-founder & AI Lead (April 2023 – January 2026)

- Managed financial planning of a student programming club, budget management, and team organization for related projects, hackathons, including partnerships coordination with sponsors.
- Led AI strategy, event organization, team mentorship, and project execution.
- Delivered technical talks and workshops on AI Agents, RAG, and LLMs at prominent venues including Nu Bank, GitHub Education, Notion, Mexican Senate, Anahuac University and Talent Land, reaching audiences ranging from students to government officials
- Award-winning participant in national hackathons (Banorte, IPN), developing innovative multi-agent systems and transportation solutions using Reinforcement learning (Q-Learning), LangGraph, Claude and Gemini.

México Evalua – Freelance Tech Project Manager (October 2022 – March 2023)

- Sold and managed web application created with technologies as Angular, Node.js, and APIs.
- Recruited development team, managed the project budget, and implemented Agile methodologies with Trello.
- Ensured timely delivery and alignment with the client's business goals.

Mexico City Government – Web Developer (September 2020 – October 2021)

- Preventive maintenance of web platforms and internal systems with Angular, Github, SQL and NodeJS

CFE – Web Developer (February 2019 – August 2019)

- Development and Maintenance of Integral System of Resources Human and Social Security, with programming languages: .Net, Asp, Css3, JavaScript and like Management of Data Base SQL Server.

EDUCATION

IPN UPIICSA – B.S. in Computer Engineering, Graduated 2024

CERTIFICATIONS & COURSES

- AWS Generative AI and AI Agents with Amazon Bedrock
- IBM AI Associate Data Scientist
- RedHat Python Programming
- AI Product Manager – IBM (In Progress)
- Agile Project Management – Google
- Scrum Developer Certified - ScrumStudy
- Foundations of Project Management – Google
- AI Agents Fundamentals – Hugging Face
- Fundamentals of LLMs - Hugging Face
- Python for Data Science – IBM
- Machine Learning with Python – IBM
- Business Analysis for Data Science – Platzi
- Introduction to LLM – Google Cloud
- Introduction to Generative AI – Google Cloud
- Creating Voice Interfaces with IBM Watson

SKILLS & TECHNOLOGIES

- Project & Team Management: Trello, Jira, Notion, MS Project
- Languages: Python, JavaScript, SQL, Go, Java
- Cloud & DevOps: OpenShift, AWS, Google Cloud Platform, IBM Cloud, Docker, Terraform
- AI & Data: Google ADK, IBM ADK, Bedrock, Watsonx.ai, LangChain, Ollama, Llama, Mistral, Pandas, Streamlit, Sklearn, Tableau, Gemini, HuggingFace, GPT, Mixtral, Gemma, Granite, PySpark, ML Algorithms
- Software: GitHub, Figma
- Languages: English (C1), German (A2)
